

Apple updates iMacs

Apple has updated its all-in-one iMac line with the latest Intel Core i3, Core i5 and Core i7 processors and powerful new graphics. The new iMac line is the fastest ever with dual-core processor speeds up to 3.6 GHz, quad-core speeds up to 2.93 GHz and discrete graphics including the powerful ATI Radeon HD 5750. The new 'Magic Trackpad', with a smooth glass and aluminium design, gives iMac users the same intuitive Multi-Touch gestures that Mac notebook customers have come to love and is available separately for \$119.

The new processors feature an integrated memory controller to access the system memory directly, allowing the new iMac to take full advantage of its faster 1333MHz memory. New discrete ATI Radeon HD processors deliver smooth, crisp graphics for the most demanding 3D games, creative software and technical applications. iMac displays feature IPS technology to deliver a brilliant image across a wide 178-degree viewing angle.

RRP from \$1999

Fujifilm's ultimate all in one camera

Fujifilm's new FinePix HS10 camera offers the world's first 30x optical zoom with manual zoom mechanism, and there is full HD movie capture. Serious photographers looking for the versatility and performance of an SLR system without the bulk or expense now have the perfect solution.

The twist-barrel manual zoom control enables you to make precision adjustments, for everything from a true wide-angle shot to ultra telephoto. The innovative technology ensures anti-blur protection from both handshake and subject movement to provide sharp, clear results even at the longest zoom settings or in the most challenging lighting conditions.

The FinePix HS10's unique Best Frame Capture Mode means you don't need the reactions of a pro sports photographer to get professional results either. The camera continuously records images from the moment you focus, then saves up to eight shots captured before you even press the shutter release.

RRP \$999

Fast, versatile MFP technology

Benefiting from Kyocera's unique ECOSYS technology, the FS-C2126MFP and FS-C2026MFP are fast, versatile A4 colour multifunctional products which support complex document requirements while reducing operational costs and waste. Both MFPs can print and copy up to 26 pages per minute, including network printing, copying, colour scanning, fax functionality (only FS-C2126MFP) and automatic duplex as standard. The MFPs suit workgroups demanding quality colour output with first class productivity and a low cost per page.

An intuitive operation panel offers simple and convenient access to everyday functions. Programmable keys enable more complex operations to be reduced to a single click of a button, saving time and reducing the risk of error. Toner replacement is quick and easy thanks to the unique ECOSYS toner cassette, which minimises cost and waste through its reduction in parts due to its class leading drum life of 200,000 pages.

Kyocera has also added two new mono products to its range. The FS-3140MFP and FS-3040MFP target busy workgroups with a high demand for fast and flawless document output.

Energy-efficient wireless laser

HP's smallest wireless laser printer, the HP LaserJet Pro P1102w, lets small and medium businesses quickly connect when on the go while benefiting from a highly energy-efficient product. It is designed for home or small office users who want an affordable HP LaserJet printer that is easy to use and helps save energy and resources.

This LaserJet helps conserve energy with its industry-first HP Auto-On/Auto-Off Technology – this reduces energy use by up to three times compared to sleep mode. Owners can configure their device to automatically turn off either when it senses there is no activity after a set interval or at a predetermined time each day.

Smart Install Technology allows for simple and quick product set-up right out of the box. It's perfect for customers who use netbooks or other PCs that do not have CD drives.

The HP LaserJet Pro P1102w lets you print from virtually anywhere in your home or office with wireless networking.
